TECHNICAL SKILLS

Programming
- JavaScript • Vanilla JS • ES6
- React JS • Redux • Redux Toolkit
- Node JS • JSON • API
- Next JS • Bootstrap
- Tailwind CSS • Firebase • Git
- CI/CD • CSS • HTML

Familiar:
- Angular • Express
- MongoDB • TypeScript
- SCSS

SOFT SKILLS

- Emotional Intelligence
- Adaptability • Creativity
- Networking • Problem-Solving
- Time Management • Teamwork

PROFILE

Chandrashekhar is a frontend developer. He spends most of his day writing codes for web applications while drinking coffee and telling bad jokes that only he laughs to. He would love to work in a competitive environment, love to learn new things, deliver quality work, and bring benefits to both sides of the table.

EXPERIENCE

ASIANA TIMES | WEB STORY INTERN
July 2023 - Present | Remote

AJATUS SOFTWARE | FRONTEND DEVELOPER INTERN
July 2022 – Sep 2022 | Bhubaneswar, Odisha
- Worked closely as a frontend developer in different projects such as User Dashboard system and Functionality, Built Web Pages and worked on different functionalities.
- Worked with user interface requirements to develop websites and web applications.

VYNCX CORPORATION | MARKETING RESEARCH ANALYST INTERN
June 2020 – Sept 2020 | Jamshedpur, Jharkhand
- I worked on the internal product designed to streamline the client review process during client onboarding.
- I conducted extensive market research to gather insights and identify key pain points in the existing review process.

PROJECTS

SLEEVE | STREET FASHION E-COMMERCE
This is a street-wear fashion destination e-commerce website. Built this using ReactJS and Redux toolkit to maintain and update data across multiple components.

JS TIPS AND TRICKS | APPLICATION FOR JS DEVELOPERS
I was preparing for my interviews and came across some very common, yet confusing concepts of JavaScript. Right then, I had this idea of creating a website where I can provide a lot of resources, notes, and some tricky concepts, all sprinkled with JavaScript and development-related memes. Built this using React JS and Bootstrap 5.

IMAGINARY TINDER | TINDER UI
I've created a UI that's just like Tinder, and added swipe-able cards with smooth swiping animations. I've used the latest Firebase version, v9, to power it up and make it even better.

CODE-X | ONLINE CODING PLATFORM
Developed a fully-functional code editor application using React JS and codemirror. Designed and implemented user interface and user experience elements to create a streamlined and intuitive experience for users.

ORGANISED | STUDENT DATABASE SYSTEM
Built using React.js and a JSON API, this is a Student Management Database with CRUD operations. Effortlessly manage student data, including personal info, academics, and attendance. Streamline administrative processes with this dynamic and efficient tool.
